

Garlando G-100 maple table football with retractable rods

Product features:

Material: MDF (Medium Density Fiberboard)

Table football auctions: Aste Rientranti

Playing field:

Product description:

The **Garlando G-100 maple table football with retractable rods** is a model characterized by three-level height-adjustable legs, which make it usable even by the little ones.

The **MDF cabinet** has a melamine coating, maple colour, 20 mm thick.

The **legs** are square metal (7 x 7 cm) with scratch-resistant paint.

The **rods** are 16 mm in diameter, made of high-strength steel with anti-rust chrome plating.

In **telescopic rods**, a smaller diameter rod slides inside the rod with the players, the end of which reenters the furniture without coming out, thus avoiding the risk of hitting children's faces and eyes.

Indestructible plastic **figures** fixed to the rods with direct moulding. Team colours: red and blue.

The steel **ball bearings** for a high smoothness of the shafts: increases the speed, and therefore the pleasantness, of the game, while reducing the stress on the players' wrists.

The **playing field** is made of green plastic laminate with white lines that reproduce the stadium ground.

The recovery of the balls in the goal takes place simply and immediately from two baskets located behind the goals.

Supplied with 10 white Standard model balls

This table football maintains an excellent quality/price ratio
