

New Nemo Trial Medicine Ball

**Product features:**

Material: Eraser

**Product description:**

The **Trial New Nemo medicine balls** are made of **cross-linked synthetic rubber with high specific weight** , this construction technology allows for **high weights** , but in **small dimensions**.

This type of medicine ball is **inflatable and bouncy**.

The valve, made of vulcanized rubber, is easily **replaceable** with a special Trial kit.

Ideal for **training and strengthening** in all sports disciplines, they have always been used in multiple contexts.

Medicine balls are used not only in **schools** , as a training aid, but also in **gyms and fitness centers**.

To differentiate the different weights available, **a color has been associated with each weight** . Trial guarantees the quality and **non-toxicity of all components**.

The **New Nemo 1 model** is approved by the IAAF as part of the **OFFICIAL KIDS ATHLETICS FOR SCHOOLS**.

**Medicine Ball Diameter**

1/2/3 KG Ø 19 cm

4/5/6 Kg Ø 24 cm

7/8/9/10 Kg Ø 29 cm
