

Trial V33 anti-trauma Mini Volley ball

Product features:

Material: Eraser

Product weight:

Outer diameter:

Product description:

The **Mini Volleyball Trial V33** has been specially designed for **children's sports**.

Made with a particular **synthetic rubber, totally non-toxic** , it is characterized by a **reticulated structure** , capable of **absorbing shocks**, and returning a low impact towards the user.

This type of material also provides a **high grip** , therefore perfect for introducing the little ones to the discipline.

Particularly appreciated as a "**school**" ball , the **Trial V33 minivolley** ball is the ideal choice for **teaching the fundamentals of volleyball** , and **protecting from the traumas** that a traditional ball would bring to less experienced players.
