Product description:

PS-M multisport electronic table scoreboard

The PS-M indoor table scoreboard is suitable for multiple sports including basketball, volleyball, table tennis, water polo, five-a-side football and many others.

Despite the size, the **readability of the information** remains high, the board is in fact equipped with **high definition LEDs** which, with a height of 9 cm, remain visible up to a **distance of over 30 meters and a visibility angle of 150°.**

The Scoreboard allows you to view the main information during the match, including the score, timeouts for each team and sets won or fouls committed by team. It also allows you to view the stopwatch, the period and ball possession or service. (via 1 light point for each team).

The biggest advantage of this scoreboard is the possibility of being controlled via the console on the back.
