Product description:

Athletics obstacle in PVC. Adjustable in height - Perfect for training Scalable training obstacle in PVC from 10 to 60 cm - pack of 6 pieces

This **set of 6 height-adjustable obstacles** represents an excellent investment for your **athletic training** . The structure is made of **PVC tubing** , a guarantee of durability and **resistance** to impacts and atmospheric agents.

Graduated in **height from a minimum of 10 to a maximum of 60 cm**, it can adapt to your training level.

The obstacle can then **be closed** , to take up minimal space. Thanks to these characteristics, it is an excellent choice both in the school context, where there is also particular attention to **accident prevention** , and among the **indispensable equipment of football schools, athletics clubs** , and in general where it is necessary to create paths to improve the athletes' performance.
