Product description:

Light barbell for weight lifting produced by **Gana Sport** , made of **galvanized tubular steel** , length **150 cm** .

To meet the great demand for **Home Fitness** products, we have created this lightweight , **economical and functional barbell for home use** .

The **balance wheel** is made of **galvanized tubular steel** with a **thickness of 3 mm** and has a **diameter of 25 mm** .

Designed for **non-professional domestic use** , it allows a **maximum load of 70 kg** (35 per side) and has **two chromed steel spring stops** for locking the discs.

With a **wheelbase of 102.50 cm**, the **balance wheel** has a useful space for **loading discs of 22.5 cm per side** .

If you have the classic spring stops, these are perfectly compatible.
