

Garlando Challenge table football with retractable rods

Product features:

Material: MDF (Medium Density Fiberboard)

Finish: Rivestimento melaminico

Accessories:

Packaging dimensions:

Product weight:

Table football auctions: Aste Rientranti

Playing field:

Product description:

The **Challenge table football** is the optimal solution of the bar line offered at very advantageous conditions. **Highly reliable and very easy to manage** by the operator, it is equipped with a playing field that can be separated from the upper part of the cabinet, which allows for easy and quick maintenance.

The cabinet is also equipped with a metal arm that supports the upper part when it is raised to allow access to the interior, making it easier to recover the proceeds and at the same time guaranteeing the safety of the operator.

The possibility of using - in addition to the **standard mechanical coin acceptor - highly sophisticated coin acceptance systems** (such as the electromechanical system or the GARL 2001 electronic system) makes it possible to satisfy the collection needs of any type of premises.

The cabinet is made of MDF with melamine coating mm thick. 30 with aluminum edges. **The legs are square metal** (9x9 cm) with **scratch-resistant silver paint** . **Adjustable feet** to level the playing field included

The playing field is made of tempered glass (5 mm thick) with a green grass background and white lines, reproducing the stadium ground.

The rods have a diameter of mm. 16, **in drawn steel with high resistance to torsion** with anti-rust chrome plating. The quality of the material used, together with the thickness of 2.2 millimetres, prevents the temples from bending, maintaining a perfect shape for a long time.

The telescopic (retracting) rods ensure the maximum level of safety . In fact, in telescopic rods, a smaller diameter rod slides inside the rod with the players, the end of which reenters the furniture without coming out, thus

avoiding the risk of blows to the children's faces and eyes. **The choice is strongly recommended if the users of the table football tables are children and in any case in all cases in which the table football table is used in environments frequented by children.**

The steel ball bearings inside the bushings that fix the rods to the furniture **significantly improve the smoothness of the rods** : the speed, and therefore the pleasantness, of the game increases, while the stress on the players' wrists is reduced.

The single-coloured little figures in plastic material (moplen), representing a stylized human figure, are fixed to the rods with direct moulding: they do not move, they do not move, they maintain their position perfectly. Color: red and blue.

Abacus scoreboard , with cubes in colors coordinated with the little men.

Challenge is equipped as standard with a mechanical pull coin acceptor, adjustable for any type of coin or token, which releases all the balls at the same time.

With the cabinet open, the playing field can be separated from the upper part of the cabinet by opening two latches, to facilitate cleaning and the possible replacement of parts.

This table football maintains an excellent quality/price ratio
