Step movement: verticale

Product description:

The Steppert Step Up is a robust stepper with small dimensions and made according to the principles of quality and functionality of the Everfit company.

The **Mini Stepper Step Up** is the ideal tool for toning the legs and buttocks and the movement is made particularly fluid and without jolts thanks to special **hydraulic shock absorbers** capable of guaranteeing an effective and smooth workout.

Integrated into the front part of the Mini Stepper is a very useful display capable of monitoring the progress of the training , the calories burned and displaying the current exercise time and the number of steps taken with automatic change of the display, without the need to necessarily intervene to change the display mode.
