Product description:

The Toorx Msx-90 multi-gym It has a weight of 195 kg , with reinforced steel tubing with a 50 x 70 mm rectangular section and double epoxy powder coating, scratch-resistant.

The MSX 90 has a **polyurethane coated braided steel cable system, with a breaking load of 2000 kg.**

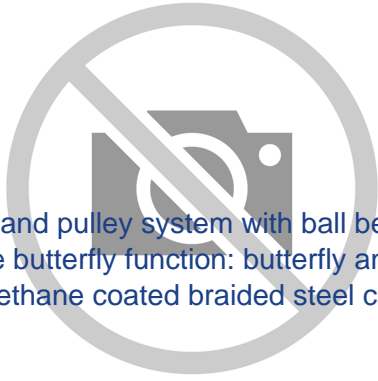

As with the previous model (MSX 70) it has a very fluid movement, thanks to the **system of pulleys and pulleys with ball bearings.**

The **weight stack is 102 kg with integral protective casing;** We have the following accessories supplied: **Triceps bar, 2 multi-adjustment handles, double rope for triceps and anklet for chin-ups.**

The main exercises performed on the MSX 90 multifunction station are the following: Triceps, Abdominal Crunch, Leg Extension, High Pull Ab Crunch, Tricep Push-down, Lat Pull Down, Biceps, Pectoral Fly, Seated Press Bar Row, Seated pulley row , Front Press, Leg Kick Back, Seated shoulder Press, Upright Row, Standing Leg Curl, Arm Curl, Adjustable Leg Press.

Characteristics:

- 102 kg weight pack with integral protective casing
- Vertical leg press adjustment on 3 levels and horizontal on 3 levels
- Arm adjustment with free cable: 6 levels

- Pulley and pulley system with ball bearings
- Double butterfly function: butterfly and rowing
- Polyurethane coated braided steel cable system.
