Pole section: 90 mm

Mepa: Disponibile

Product description:

The **Gana Sport Basket and mini-basket adjustable system (single basket)** has an **ABS backboard, steel hoop and net in according to regulations.**

The **height is adjustable, 3.05 m to play basketball and 2.60 m to play mini-basket.** It is the best solution chosen by individuals, schools and sports associations for playing basketball in a simple and safe way, **without fixing the system on the ground.**

This **system** is also **trasportable** so it can be easy **movable on the wheels.**

The **ABS backboard**, with a surface of 110x72 cm around, guarantees an excellent ball bounce, and is equipped with steel hoop and net in according to regulations.

The rectangular steel base has a **ballast** of around 90 lt, which can be filled with sand or cement, giving **more stability to the system.**

The ballast is not removable, it is a part of the system. Once assembled, the system cannot be moved.

The **backboard height** can be adjusted just pulling out the pole from its slot, unscrewing the pin.

The system is sold individually in a modular structure, for an easy storage and includes:

n°1 pole diameter mm.90

n°1 base with ballast and wheels

n°1 ABS backboard complete with hoop and net.

Product entirely Made in Italy in our factories.
