**Product description:**

The **Garlando F-3 table football with protruding rods** is made with quality materials and with great attention to detail and offers innovative solutions such as the elegant inclined legs which increase stability during play.

The **MDF cabinet** with melamine covering and maple color has a thickness of 15 mm. The **sturdy and elegant inclined legs** in MDF with black melamine coating and chrome connection bars make the table stable even during games. Chrome-plated adjustable feet are standard for perfect leveling of the playing surface even on uneven floors.

The **MDF playing field** with melamine covering has a grass green background and white lines, which reproduce the stadium ground.

**Equipped with tubular rods** with a diameter of 13 mm and a thickness of 1 mm. In the version with the protruding rods, the end parts of the rods are covered by plastic protections for greater safety.

Scoring goals is easier and more fun thanks to the **goalkeeper who rotates on himself** and the particular configuration of the players, arranged according to the scheme: 1 (goalkeeper), 2 (defenders), 4 (midfielders), 3 (forwards).

Simple and immediate **recovery** of balls into goals from two portholes located behind the headers.

2 white-black soccer ball effect balls supplied.

**This table football maintains an excellent quality/price ratio**
