Product description:

The **Garlando F-20 evolution table football with protruding rods** features a black cabinet and silver Evolution logo. Equipped with folding legs, it is dedicated to those who have space problems: once folded it can be stored after use to optimize the space available.

Special rubber pads allow the box to rest more easily on the ground when the table football table is in a vertical position.

The **MDF cabinet** with melamine coating has a thickness of 16 mm. The MDF legs are 30 mm thick with melamine covering, inclined for perfect stability and foldable under the furniture.

The **playing field** is made of plastic laminate with inclined corners. The white lines silk-screened on a green background reproduce the stadium ground.

The **outgoing rods** are 13 mm in diameter in solid iron. The ends of the rods are covered by plastic protections for greater safety.

Equipped with multicolored men with a goalkeeper who performs a complete turn on himself, making it easier to score goals.

Simple and immediate **recovery** of balls in the goal from two ball catchers located behind the goals.

Supplied with 10 white Standard model balls.

This table football maintains an excellent quality/price ratio
