

Garlando G-500 pure white table football with recessed rods

Product features:

Material: MDF (Medium Density Fiberboard)

Packaging dimensions:

Product weight:

Table football auctions: Aste Rientranti

Playing field:

Product description:

The **Garlando G-500 pure white table football with recessed rods** is characterized by the particular refinement of the almost total white of this table football and by the characteristics of robustness, stability and playability.

The **MDF cabinet** has a melamine coating and a thickness of 25 mm. White in color with glossy finish and silver-coloured mobile edges.

The **legs** are made of metal with silver powder coating. The considerable dimensions (9 x 9 cm) guarantee the necessary stability on the ground. Adjustable feet for a perfectly level playing field.

The **rods** have a diameter of 16 mm, in drawn steel, with high resistance to torsion and anti-rust chrome plating. The quality of the material used, together with the 2 millimeter thickness, prevents the temples from bending, maintaining a perfect shape for a long time.

Safety device for the rods (telescopic rods): upon request it is possible to supply the table football with telescopic safety rods to replace the outgoing ones. Made of the same material and with the same technical characteristics as the outgoing ones, they differ in their operation, which ensures the maximum level of safety.

In **telescopic rods**, a smaller diameter rod slides inside the rod with the players, the end of which reenters the furniture without coming out, thus avoiding the risk of hitting children's faces and eyes.

The rods are fixed to the furniture using nylon bushings.

Single-colored **figures** in plastic material (moplen) representing a stylized human figure, fixed to the rods with direct

molding: they do not move, they do not move, they maintain their position perfectly. Team colours: white and grey.

The steel **ball bearings** inside the bushings significantly improve the smoothness of the shafts: it increases the speed, and therefore the pleasantness, of the game, while reducing the stress on the players' wrists.

Silver plastic **knobs** with wenge wood inserts, for a more pleasant grip.

The **playing field** is made of tempered glass with a white background and gray lines.

Insertion of balls onto the pitch via **two outlets on the sides of the table football table** .

The recovery of the balls in the goal, simple and immediate, occurs manually through an opening on one side of the table football with aluminum finish.

Plastic **scoreboard** cubes, in colors coordinated with the little men.

Supplied with 10 white Standard model balls

This table football maintains an excellent quality/price ratio
