

Garlando F-200 Evolution table football with retractable rods

Product features:

Material: MDF (Medium Density Fiberboard)

Packaging dimensions:

Product weight:

Table football auctions: Aste Rientranti

Product description:

The **Garlando F-200 Evolution table football with retractable rods** is characterized by the elegant black and silver combination inspired by the glamor of hi-tech. Like its twin F-200, it is a robust football table, highly playable and suitable for use by the whole family

The 2 centimeter thick **MDF cabinet** has a melamine coating. It has a black color with silver edging and silk-screen printing.

The square **legs** (9 x 9 cm) in MDF are 15 mm thick with melamine coating, silver colour. The considerable dimensions guarantee the necessary stability on the ground. This model **does not provide the possibility of installing adjustable feet.**

The **rods** have a diameter of mm. 16 in high torsion-resistant drawn steel with anti-rust chrome plating. The quality of the material used, together with the 2 millimeter thickness, prevents the temples from bending, maintaining a perfect shape for a long time. It is possible to choose between outgoing rods and retracting (telescopic) rods.

Safety device for the rods (telescopic rods): upon request it is possible to supply the table football with telescopic safety rods to replace the outgoing ones. Made of the same material and with the same technical characteristics as the outgoing ones, they differ in their operation, which ensures the maximum level of safety.

In **telescopic rods**, a smaller diameter rod slides inside the rod with the players, the end of which reenters the furniture without coming out, thus avoiding the risk of hitting children's faces and eyes.

The rods are fixed to the furniture using nylon bushings.

Single-colored **figures** in plastic material (moplen) representing a stylized human figure, fixed to the rods with direct molding: they do not move, they do not move, they maintain their position perfectly. Team colours: red and blue.

The steel ball bearings inside the bushings significantly improve the smoothness of the shafts: it increases the speed, and therefore the pleasantness, of the game, while reducing the stress on the players' wrists.

The playing **field** is made of tempered glass (5 mm thick) with a grass green background and white lines that reproduce the stadium ground.

Insertion of balls onto the pitch via **two outlets on the sides of the table football table** .

The recovery of the balls in the goal, simple and immediate, occurs manually through an opening on one side of the table football with aluminum finish.

Plastic **scoreboard** cubes, in colors coordinated with the little men.

Supplied with 10 white Standard model balls

This table football maintains an excellent quality/price ratio
